1. Highlight shade: Apply to brow bone only.
2. Midtone shade: Start at the base of your upper lash line and bring the color up and over your entire lid all the way up to your brow bone. Also brush it along the lower lash line: this will help to create definition.
3. Contour shade: Again, start at the base of your lash line and layer the color over your midtone all the way across your lid and up into the crease. Now sweep the contour color underneath the lower lash line as well. You'll create a light-to-dark effect with the three eye shadows, with the darkest shade applied closest to the lash line and fading as you go toward the brow.
4. With this look, make sure you line your entire eye all along the top and bottom lash line.

Honey Spice	Hazelnut
Steel	Pink Petal Cheek Color
