Facial in a Bag Instruction Sheet tips:

- ** You'll notice that we gave the instructions for the facial according to the way I do a skin care class.
- ** On one side of the face, the "pampered side" we have all of the products, including both Day and Night Solutions.
- ** On the other side, they will only have cleanser and moisturizer.
- ** I'm such a believer in the 1/2 face approach to a facial. When a customer tries both the day AND night on one side, they will feel a dramatic difference between the two sides.
- ** I don't just put the Night Solution on the back of a hand, because this is the product that makes such a difference in the way the skin feels.
- ** You always put the NIGHT Solution on first, then the Day Solution right on top.
- ** Try it yourself and see!
- ** You'll notice that there are no foundation samples or color samples included. It would be your choice to add more. But most ladies would try it at night after work, and they would be ready for bed without washing the products off.
- ** You are focusing on the skin care system--the Ultimate Miracle Set--which should be the foundation of our business. You can share with her that the set also includes foundation.
